

The RapidSOS Advantage

Built for Public Safety, with Public Safety

We've heard you - you have too many screens, you need all the data available in one place, and time is lost due to insufficient communications. RapidSOS now delivers an all-in-one mapping solution with more free features to help to streamline workflows and provide even better situational awareness during an incident.

One unified map solution for ECC operations

Easy access to more incident-rich call information

Enhanced efficiency through digital requests for service
